

## Janam XM Series - Take Screenshots with your Windows Mobile Device

Ilium Software Screen Capture is a free, fast, and easy screen capturing program for your Janam XM60 Windows Mobile device. Download a copy today and you'll be able to take screenshots quickly, whenever you need to!

### 1

#### Download Ilium Software Screen Capture

- » **Download** the free application from:  
[http://www.iliumsoft.com/site/fp/screen\\_capture.php](http://www.iliumsoft.com/site/fp/screen_capture.php)

### 2

#### How To Take A Screen Capture

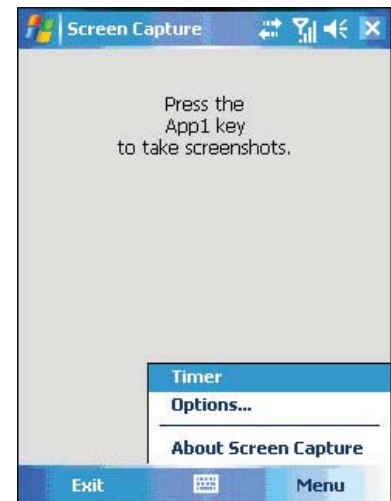

- » **Start** the program on your Janam XM device.
- » **Use** the "Options" menu to define the key you want to press to take your screenshots. (Leave the program open. Do not hit the Exit button yet.)
- » **Take** your screenshots. If you have sound on, you will hear a camera "click" noise when the screen is captured.
- » **To stop** the program, open it again and hit the Exit button.
- » **Find** your screen captures on your device. Screen captures are stored as bitmaps in the "My Documents" folder on the Janam XM60. You can cradle the device and use "Explore" to copy and paste snapshots to your workstation.

### 3

#### Using the Timer

The "Options" menu in Ilium Software Screen Capture features a timer function. To set up:

- » **Tap** "Start" then "Menu". Tap "Options".
- » **Change** the timer setting to desired time interval. Press the "ENT" key on the Janam keyboard to accept the timer setting.
- » **Tap** "Menu" then "Timer".
- » **Navigate** to the screen you want to capture within the time you selected. You can tap the Microsoft (red/blue/yellow/green) flag to gain access to the desktop and navigate your screens. You will hear a camera audio sound when the snapshot is taken.

#### HELPFUL HINT

Visit [http://www.iliumsoft.com/site/fp/screen\\_capture.php#keys#keys](http://www.iliumsoft.com/site/fp/screen_capture.php#keys#keys) to learn more about keys.

Please Note: Ilium Software Screen Capture is a free utility. Phone or email support is not available. The complete instructions are listed here. Following these steps is all that is required to run the program properly.
