

JANAMCARE XM66 ROM Update Instructions

Contact: janamcare@janam.com

This ROM update procedure will erase any data and software added to the device, please ensure all data and programs are backed up before performing ROM update.

Once you have downloaded the ROM, follow the instructions below to load the ROM on your XM66s.

To install the latest ROM:

1. Remove battery door from unit.
2. Place fully charged battery in device.
3. Press and hold the right trigger button (LCD display facing you) while you press and release the reset button, which is located in the battery compartment. You **MUST KEEP** right trigger button pressed until USB appears on the screen.
4. When the USB screen appears, release the right trigger button.
5. Insert the XM66 into a Janam USB cradle or attach to USB cable.
6. Connect other end of cable to the USB port of your PC. When connected, a removable drive will appear in My Computer on your desktop. In the screenshot at right, it appears as Removable Disk (E:) or it may appear as a mobile device.
7. Locate the appropriate ROM BIN file that you received from Janam earlier. Copy the ROM BIN file to the drive window that opened when you connected the device to the PC.
8. Go to My Computer on your PC.
 - Select the drive that appeared when the cable was attached by left-clicking on it.
 - Then, right-click to obtain the pull-down menu.
 - From the pull-down menu, click eject.
9. Device will start to boot up about 10 seconds after the drive is ejected. Remove cable or remove device from cradle and perform a "Hard-Reset".
10. Hard reset the device by following these steps:
 - While holding down the up-arrow on the keypad, press and release the reset button, which is located in the battery compartment.
 - Continue holding down the up-arrow until a message displays on the device screen warning that you are about to erase all the data, press the enter button on keypad to erase all data.

- After pressing enter, re-install the battery door and the XM66 will reboot. Follow the on-screen instructions to set up your device.
- The new ROM is now loaded on your Janam XM66.
